Subject: charts with digester information
Attachments: treatmentproc21419.xlsx; GenFact21419.xlsx

Hi Charlotte,

The attached chart "treatmentproc" shows which biosolids treatment processes major POTWs in Region 9 have. There is either a "999" or the actual number of units in the column for each process – mesophilic digesters are in column D and thermophilic digesters in column G. I had started to record data on actual detention times, but haven't updated that recently. Most of the data is several years old (more so for AZ facilities, since we authorized AZ for the biosolids program in 2004).

The chart "GenFac" includes general information about the POTWs. Column X shows design flow, column Y shows actual flow (most of this dates back to 2015), and column Z shows dry metric tons of biosolids produced (most of this is current to 2017 or 2018).

Lauren
